

Container registration with the own app by CompControl

StockControl

Warehouse management

- Chaotic warehouse management (or fixed location) of the recorded containers at the incoming goods
- Individual storage strategies (Chaotic, Partially Chaotic, fixed location)
- Connection of different storage hardware systems (ASYS TOTECH, TowerFactory, MIMOT, KARDEX, HAENEL etc.)
- Pick per Light system for easy storage and retrieval operations
- iPod hand scanner equipped with its own APP for manual warehouse activities
- Automatic storage operations by coupling with the machines and storage systems (ASM, FUJI, JUKI etc.)
- Automatic quantity adjustment of the containers (with ASM, FUJI, JUKI etc.)
- Automatic stock corrections in the ERP systems (SAP, proALPHA, Navision, FOSS, CANIAS etc.)
- Automatic connection of the X-ray component counters (VisiConsult, NORDSON Dage etc.)
- Individual outsourcing and picking of production orders, path-optimized, storage area optimized, equipment or complete, division of MSL components to be considered separately
- Tool for current stock overview (total stock, individual storage area etc.) and material search as well as the display of the movement data (also of the material which is not available anymore)
